

PERIPHERAL DEVICES

Printers, Scanners & Webcams

Types, Real-Life Uses & Connection Interfaces

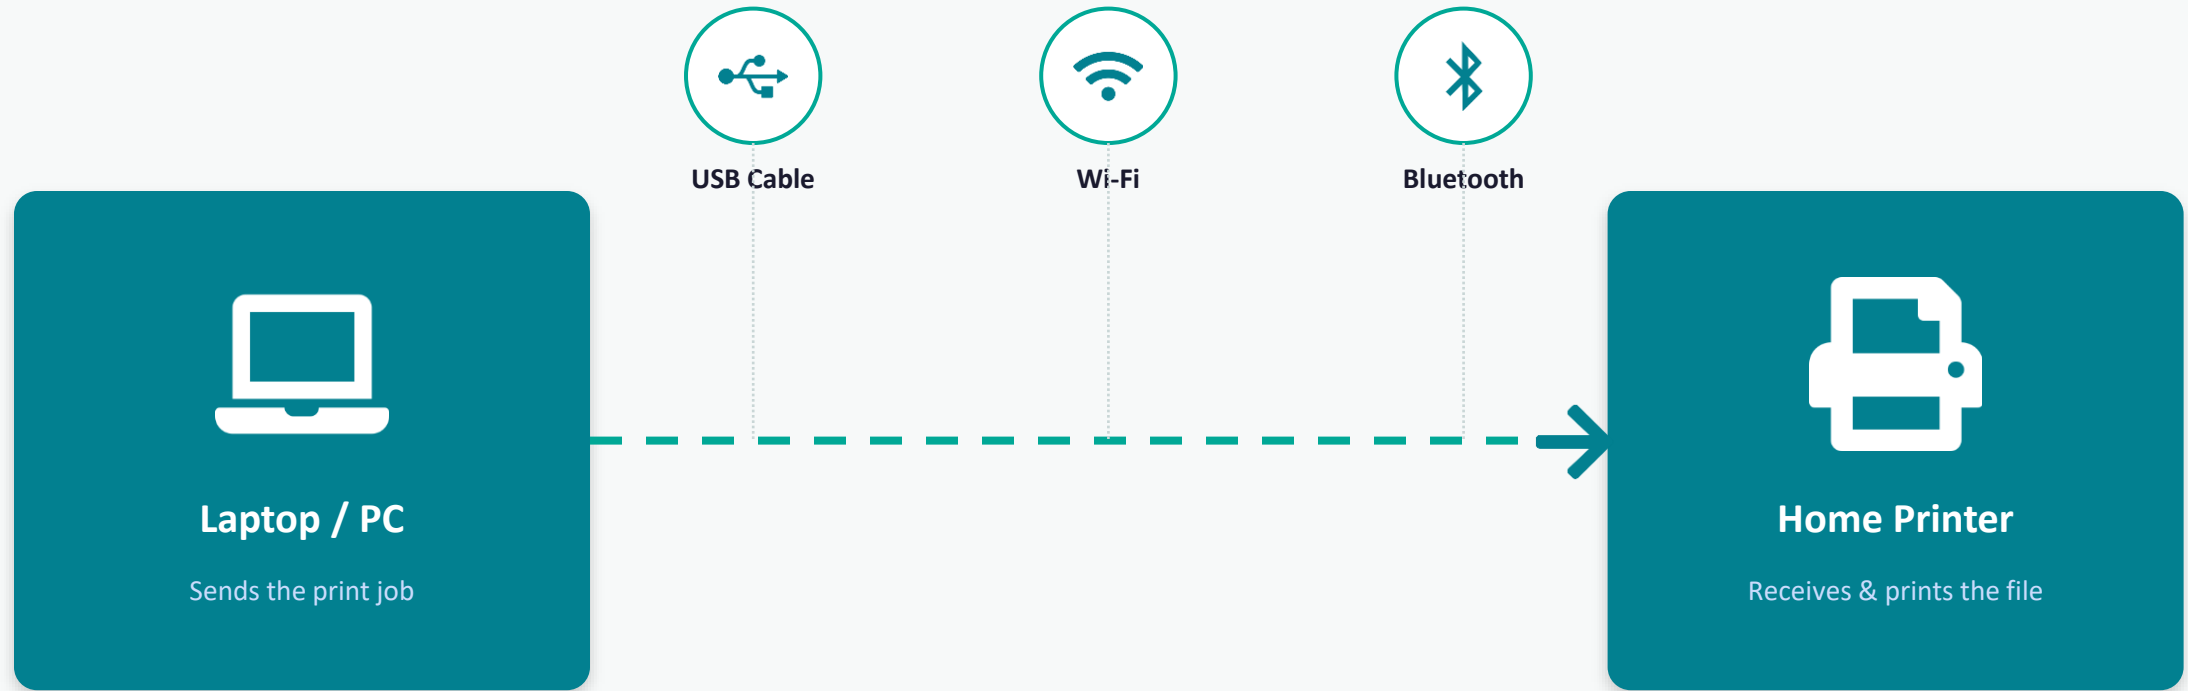

Task 1

Devices & Real-Life Use Cases

Category	Type	Real-Life Use Case
Printer	Inkjet Printer	Printing college assignments and colour photos at home
	Laser Printer	Fast, high-volume printing of office reports and forms
	3D Printer	Building prototype models for engineering projects
Scanner	Flatbed Scanner	Scanning certificates and ID documents for admission forms
	Sheet-Fed Scanner	Quickly digitising large stacks of office paperwork
Webcam	USB Webcam	Attending online classes and video interviews
	Built-in Laptop Webcam	Joining everyday video conferencing meetings

Task 2

How a Printer Connects to a Laptop

Connection interface used: USB (wired) or Wi-Fi / Bluetooth (wireless)

Task 3

Connection Interfaces: Pros & Cons

USB

Advantage

Fast, stable, no signal interference

Disadvantage

Needs a cable — limits movement & range

Wi-Fi

Advantage

Wireless — multiple devices can connect at once

Disadvantage

Needs network setup; can lag if signal is weak

Bluetooth

Advantage

Easy pairing, no router or network needed

Disadvantage

Shorter range and slower transfer speed

Task 4

Connecting My Printer via USB

Device chosen: Inkjet printer used at home

1

Place & power on

Position the printer near the computer and plug it into a power outlet.

2

Install drivers

Insert the setup CD or download the printer driver from the manufacturer's website.

3

Connect the cable

Plug the USB cable into the printer and into a free USB port on the computer.

4

Wait for detection

The computer automatically detects the new device and finishes installing it.

5

Print a test page

Open Settings > Printers, select the printer, and print a test page to confirm setup.

Wireless alternative: connect via Wi-Fi by selecting "Add Printer" on the computer, choosing the printer's network name, and entering the Wi-Fi password when prompted.
