

# Connecting and Testing Peripherals Practical

## Task 1: Webcam Setup

- Connect a USB webcam to your computer.
- Install any required drivers.
- Open the default camera app and capture a photo to verify it is working.

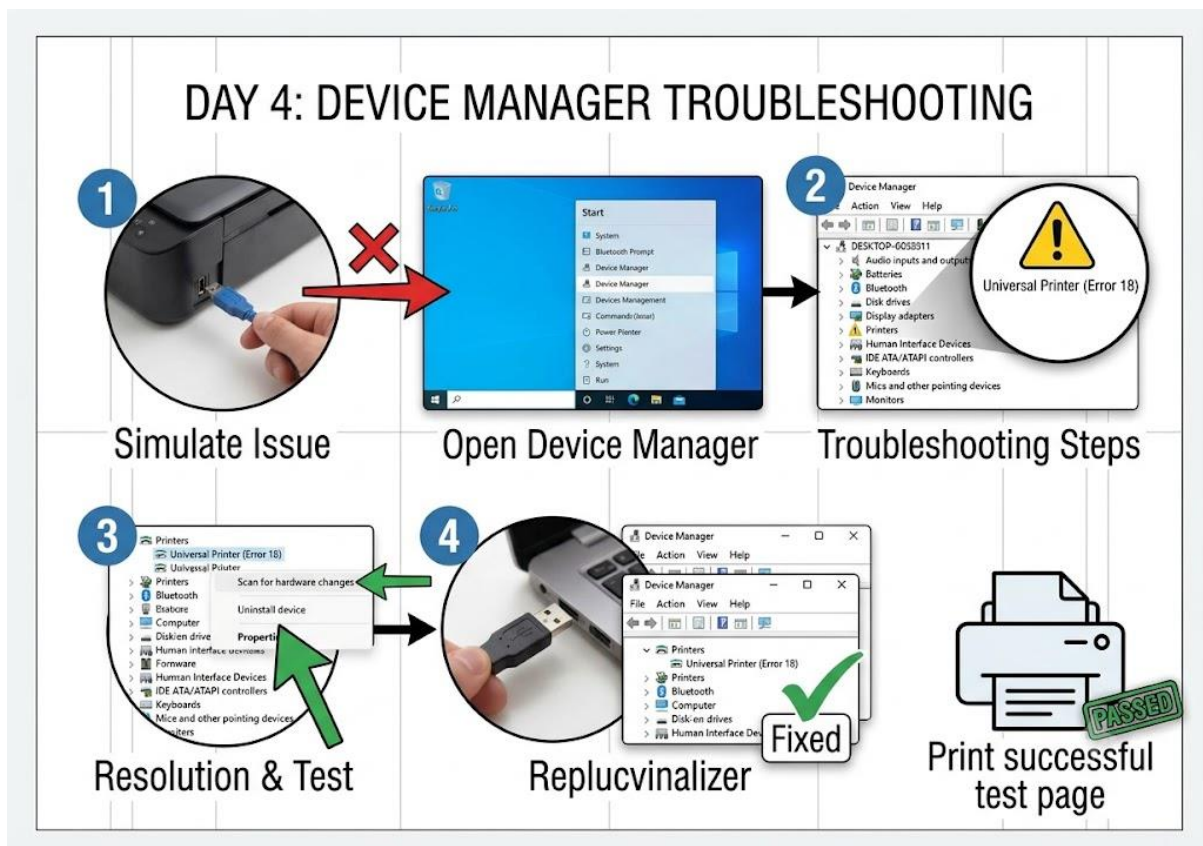

## ? Task 2: Printer Installation

- Set up a local USB or network printer.
- Install the correct driver and print a test page to confirm a successful installation.

### ? Task 3: Device Manager Troubleshooting

- Simulate a connectivity issue by unplugging the printer's USB cable.
- Open Windows Device Manager to identify and fix the "printer not detected" error.
- *Hint:* Look for error icons and click "Scan for hardware changes" after reconnecting the cable.

#### ? Task 4: App-Specific Camera Issues

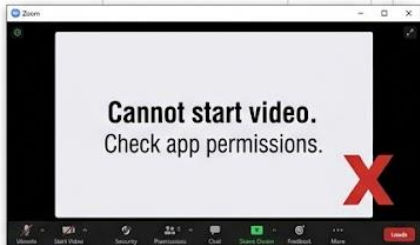

- Troubleshoot a scenario where the webcam works in the default camera app but not in Zoom.
- *Hint:* Check if another application is actively using the webcam, or verify that camera permissions are enabled for Zoom.

**DAY 4: APP-SPECIFIC CAMERA ISSUES**

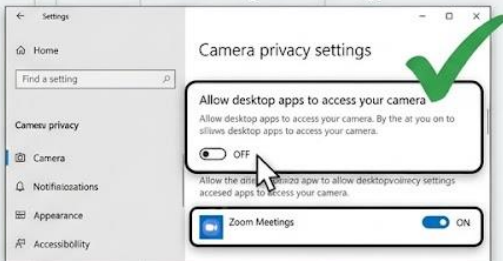

**1. Verify Camera in Another App**

**2. Observe Failure in Zoom**

**3. Check Privacy Settings**

**4. Fixed & Tested in Zoom**

**Verify Permissions (Hint)**
